CONFIDENTIAL - Calloway Metrics

# Organizational Restructuring Plan, Q4 2026 (Project Juniper)

Version v5 | Last updated Oct 9, 2026 | Owner: R. Okafor (CFO), P. Ramanathan (VP People) | Distribution: CEO, CFO, VP People, GC ONLY | Change note: eng cut reduced 16 -> 12

STRICTLY CONFIDENTIAL. Project Juniper. Distribution limited to the CEO, CFO, VP of People and General Counsel. Do not discuss with managers until the manager briefing on November 9. Unauthorized disclosure may result in termination.

Objective. Reduce monthly net burn from 1.9 million dollars to below 1.2 million dollars by the end of Q1 2027, extending runway beyond 2029 without new capital. The plan reduces headcount by 58 roles, about 14 percent of the company, and eliminates 1.3 million dollars of annual vendor spend.

- Sales development: 14 roles, consolidating to a single team in Austin
- Marketing: 9 roles, including the events team
- Customer success: 11 roles, moving SMB accounts to a pooled model
- Engineering: 12 roles, primarily the embedded SDK team and legacy reporting
- G and A: 8 roles across finance, IT and recruiting
- Product and design: 4 roles

Timeline. The manager briefing occurs on Monday, November 9 at 8:00 AM Eastern. Affected employees are notified in individual meetings on Tuesday, November 10, between 9:00 AM and 12:00 PM local time. A company wide all hands follows at 1:00 PM Eastern. System access for affected employees is removed at 9:00 AM on November 10, before notification meetings begin.

Severance. Affected employees receive 10 weeks of base pay plus one additional week per year of service, capped at 20 weeks. COBRA premiums are covered for 4 months. Equity vesting accelerates by 3 months. Employees on visas receive an additional 4 weeks of pay and immigration counsel support. Total estimated severance cost is 3.6 million dollars, recorded as a restructuring charge in Q4.

Legal considerations. Because the Austin office reduction affects fewer than 50 employees at a single site, a WARN Act notice is not required, but counsel recommends a disparate impact analysis, which has been completed and shows no adverse impact by age, gender or race at the 80 percent threshold. Employees over 40 receive 45 days to review the release under OWBPA.

Communications. The CEO will send a company wide email at 12:45 PM Eastern on November 10. Customer facing teams will receive talking points for accounts whose customer success manager is affected. Talking points emphasize that the change focuses the company on real time analytics and the AI analyst. Do not mention the Ferrolake acquisition in the context of the restructuring.

Retention. A retention grant pool of 1.4 million dollars in RSUs is reserved for 35 remaining employees identified as critical, primarily in platform engineering and Project Lantern. Retention letters will be delivered on November 11.

Contingency. If news leaks early, notifications move to the next business morning. [PR: still need final list from Marketing, Heather was out sick, chasing Thurs]

Risks. Leakage before November 9 is the largest risk. We have observed increased recruiting outreach from Quillmark to our customer success team. Morale impact on the remaining team is expected; managers will receive training on November 9 afternoon. A second smaller reduction is

not planned and should not be implied.

Document control and handling. This document is classified CONFIDENTIAL under the Calloway Metrics Information Classification Policy. It may be stored only in approved company systems and must not be uploaded, pasted or summarized in external services, including consumer AI assistants, translation sites or personal email. Printed copies must be shredded after use. Report suspected disclosure to the Security team within one hour of discovery.
