CALLOWAY METRICS

Analytics for the real-time enterprise

Date: Sep 14, 2026 Author: Dana Whitcombe, CEO Calloway Metrics, Inc.

Board Memo Excerpt

Strategic rationale. Our largest enterprise customers have told us for three consecutive quarters that batch refresh windows of four hours are no longer acceptable. Ferrolake built a change data capture engine, internally called Riptrace, that streams warehouse updates with a median latency of 900 milliseconds. Building an equivalent engine in house would take an estimated 22 engineer quarters and delay our real time dashboards product until at least Q3 2028. Acquiring Ferrolake brings the product to market in Q2 2027.

Financial summary. Ferrolake reported trailing twelve month revenue of 6.2 million dollars with 71 percent gross margin and net revenue retention of 118 percent. The company burns roughly 480,000 dollars per month and has 7 months of runway, which gives us meaningful leverage on price. The proposed structure is 24 million dollars in cash at close, 11.5 million dollars in Calloway stock, and an earnout of up to 6 million dollars tied to Riptrace reaching 40 enterprise deployments by December 2027.
